

# VPAT™

## Voluntary Product Accessibility Template®

Version 1.3

The purpose of the **Voluntary Product Accessibility Template**, or **VPAT™**, is to assist Federal contracting officials and other buyers in making preliminary assessments regarding the availability of commercial “Electronic and Information Technology” products and services with features that support accessibility. It is assumed and recommended that offerers will provide additional contact information to facilitate more detailed inquiries.

The first table of the Template provides a summary view of the Section 508 Standards. The subsequent tables provide more detailed views of each subsection. There are three columns in each table. Column one of the Summary Table describes the subsections of subparts B and C of the Standards. The second column describes the supporting features of the product or refers you to the corresponding detailed table, e.g., “equivalent facilitation.” The third column contains any additional remarks and explanations regarding the product. In the subsequent tables, the first column contains the lettered paragraphs of the subsections. The second column describes the supporting features of the product with regard to that paragraph. The third column contains any additional remarks and explanations regarding the product.

**VPAT™**

**Voluntary Product Accessibility Template®**

<b><i>Criteria</i></b>	<b>Supporting Features</b>	<b>Remarks and explanations</b>
(a) A text equivalent for every non-text element shall be provided (e.g., via "alt", "longdesc", or in element content).	Yes	We provide text equivalent for content we have control over and have reasonable text alternative.
(b) Equivalent alternatives for any	N/A	We do not offer

multimedia presentation shall be synchronized with the presentation.		multimedia presentations
(c) Web pages shall be designed so that all information conveyed with color is also available without color, for example from context or markup.	Yes	Color is only used for user interface design and not for user experience.
(d) Documents shall be organized so they are readable without requiring an associated style sheet.	Yes	This feature is available to reasonable extent.
(e) Redundant text links shall be provided for each active region of a server-side image map.	N/A	We do not offer image maps.
(f) Client-side image maps shall be provided instead of server-side image maps except where the regions cannot be defined with an available geometric shape.	N/A	We do not offer image maps
(g) Row and column headers shall be identified for data tables.	N/A	No data tables are offered
(h) Markup shall be used to associate data cells and header cells for data tables that have two or more logical levels of row or column headers.	N/A	No data tables are offered
(i) Frames shall be titled with text that facilitates frame identification and navigation	Yes	We do not make use of frames, 3 <sup>rd</sup> party providers like google use iframes and are outside of our control
(j) Pages shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz.	N/A	Website has been tested against WCAG 2.0 and has been found to have no problems.
(k) A text-only page, with equivalent information or functionality, shall be	N/A	Not available in the

provided to make a web site comply with the provisions of this part, when compliance cannot be accomplished in any other way. The content of the text-only page shall be updated whenever the primary page changes.		taylorfrancis.com platform
(l) When pages utilize scripting languages to display content, or to create interface elements, the information provided by the script shall be identified with functional text that can be read by Assistive Technology.	Yes	Available to a reasonable extent.
(m) When a web page requires that an applet, plug-in or other application be present on the client system to interpret page content, the page must provide a link to a plug-in or applet that complies with §1194.21(a) through (l).	N/A	No pages on taylorfrancis.com require applets, plugins, or installed applications.
(n) When electronic forms are designed to be completed on-line, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	Yes	Available to a reasonable extent
(o) A method shall be provided that permits users to skip repetitive navigation links.	Yes	
(p) When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required.	N/A	No timed responses are required on taylorfrancis.com

Note to 1194.22: The Board interprets paragraphs (a) through (k) of this section as consistent with the following priority 1 Checkpoints of the Web Content Accessibility Guidelines 1.0 (WCAG 1.0) (May 5 1999) published by the Web Accessibility Initiative of the World Wide Web Consortium: Paragraph (a) - 1.1, (b) - 1.4, (c) - 2.1, (d) - 6.1, (e) - 1.2, (f) - 9.1, (g) - 5.1, (h) - 5.2, (i) - 12.1, (j) - 7.1, (k) - 11.4.
